Search Tips

- [Word Combination Operators](#)
 - [Word Operators](#)
 - [Field Operators](#)
 - [Using Modifiers](#)
 - [Rules for Adding Modifiers](#)
-

Operators are special words used by our search engine which indicate the search rule. You can search for any of the words or phrases in the text of the document or you can search for values in the field attributes associated with your documents. You use operators in your queries to search for:

- Word combinations
- Exact or similar word spellings
- Expansions of words to lists of related words
- A specific field value or a range of field values
- Operators enable you to build more sophisticated queries so you can achieve more precise results.

Word Combination Operators

Word combination operators tell products how to search for combinations of words, phrases, or a word and a phrase:
